Service Information Sheet

Establishing fire safety organizations

Objective

Getting a handle on fire safety and rescue by incorporating an experienced team of fire specialists.

Description

For companies with increased fire risks or having a large need for fire department expertise, it is often wise and efficient to set up a professionally created fire safety organization. In some cases this is also required by law or your insurance provider. In close collaboration with the client, Disc can put together a team suited to your specific needs. By placing our employees within your organization, who possess all the necessary theoretical knowledge and practical experience, your (project) organization will have professional support regarding fire prevention.

Disc is capable of forming teams, which can be grouped into the following main classifications:

- Complete fire department teams.
- Emergency Response Teams (ERT).
- Teams comprised of paramedics and first aiders.

A combination of the aforementioned groups can, of course, also be formed if preferred by your organization.

Below are some of the services provided:

- Take repressive and preventive action.
- Teaching and instruction.
- Evacuation coordination and drills.
- Inspections and technical checks.
- Light medical duties.
- Developing plans of action.
- In-house emergency and first aid service plans and activities (EFS).

If desired, the set of services can be customized after consultation with the client.

Approach

Should you choose to engage Disc for this service, we will make an appointment with you to assess your own ideas, wishes, and perhaps even fixed requirements. Thereafter, we will present a proposal that we feel best suits your needs. Included in this proposal will be an open offer. Upon written receipt of the agreement, we will consult with you to develop a plan of action so we can begin working.

Price Indication

We hire out our experts within your organization based on hourly rates. For this service, these rates range anywhere between €35,- and €100,- per hour, during normal business hours.

This rate, however, does not include:

- VAT.
- Travel and lodging costs.
- Equipment costs.

If desired, we can generate an estimate of the total anticipated costs for your health and safety project.

For each request, a formal quote will be provided.
